Additional Info:

These are just a guide; there may be other questions which arise as well. Our bearing products are designed to be a 'cost savings' related item.

### BEARING QUESTIONS

1) Are there any bearing which you replace regularly that could benefit from an alternative material option?  
*i.e. Corrosion, lubrication, inaccessibility to lubricate.*

2) What type of environment are the bearings subject to?  
*i.e. Wet, dry, dusty, dirty.*

3) What type of machinery or apparatus are the bearings being used on?  
*i.e. Packaging, food processing, chemical, etc.*

4) Have you had any experience with plastic or SS bearings? Outcome?

5) How are the bearings being used?  
*i.e. Inside conveyor rollers, idler rollers, elsewhere.*

6) How many hours per day are the bearings subject to this environment?

7) How many bearings are used in the application?
