

MONROE
COMPONENT SOLUTIONS
PRECISION MACHINING

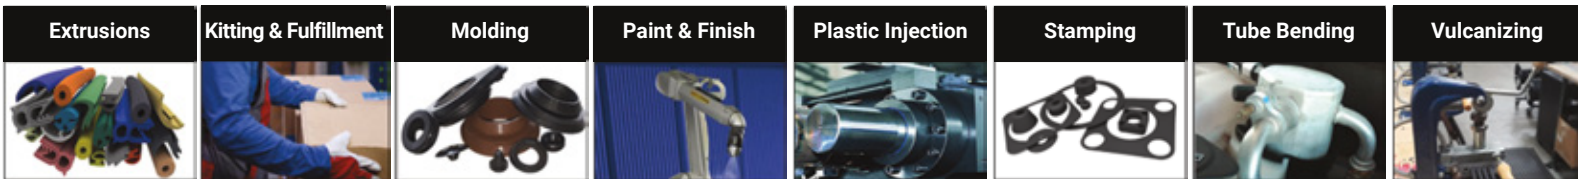

WHAT WE DO!

Monroe has put together systems, facilities, tools, and an outstanding team for the manufacture, assembly and testing of factory automation systems and sub-assemblies. All jobs down to the details are evaluated for manufacturability, materials, processing, tolerances, and function, against our engineering and manufacturing experience.

ON TIME - WITHIN BUDGET - TO SPECIFICATIONS - MEET QUALITY REQUIREMENTS

ADDITIONAL CAPABILITIES

If your project requires a custom manufactured solution, from details to complex assemblies, we are ready to quote, manufacture, and assemble. Transforming your concept from models or drawings into a working product, our team is ready to take on your next manufacturing challenge.

How can we help?

QUALITY

Monroe is AS9100D & ISO 9001:2015 registered. As such our processes include in-process and final inspection with equipment calibrated to standards traceable to NIST. We have functional test & run-off, as well as CMM certification of parts and assemblies in an environmentally controlled CMM Room.

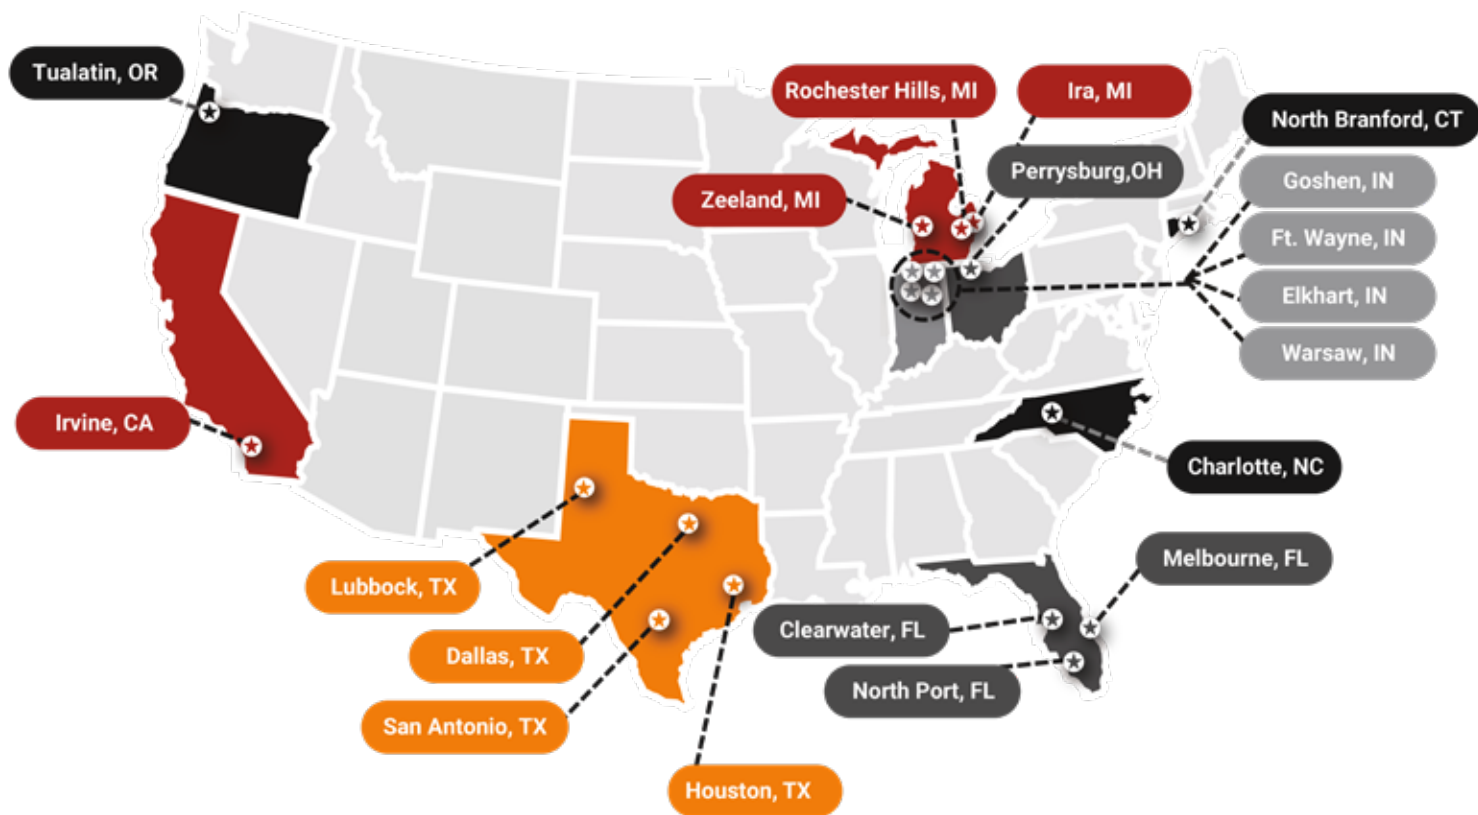

CAPABILITIES INCLUDE

- Precision CNC Machining
- Complete Sub-Assembly MFG
- Low Volume & Prototype Parts
- Robot (EOAT) Grippers & Cells
- Pallet Fixtures
- Conveyors
- Design with Solidworks (3D & 2D)
- AutoCAD
- Complete Manufacture
- Assembly
- Testing
- Workholding Fixtures
- Assembly and Test Stations

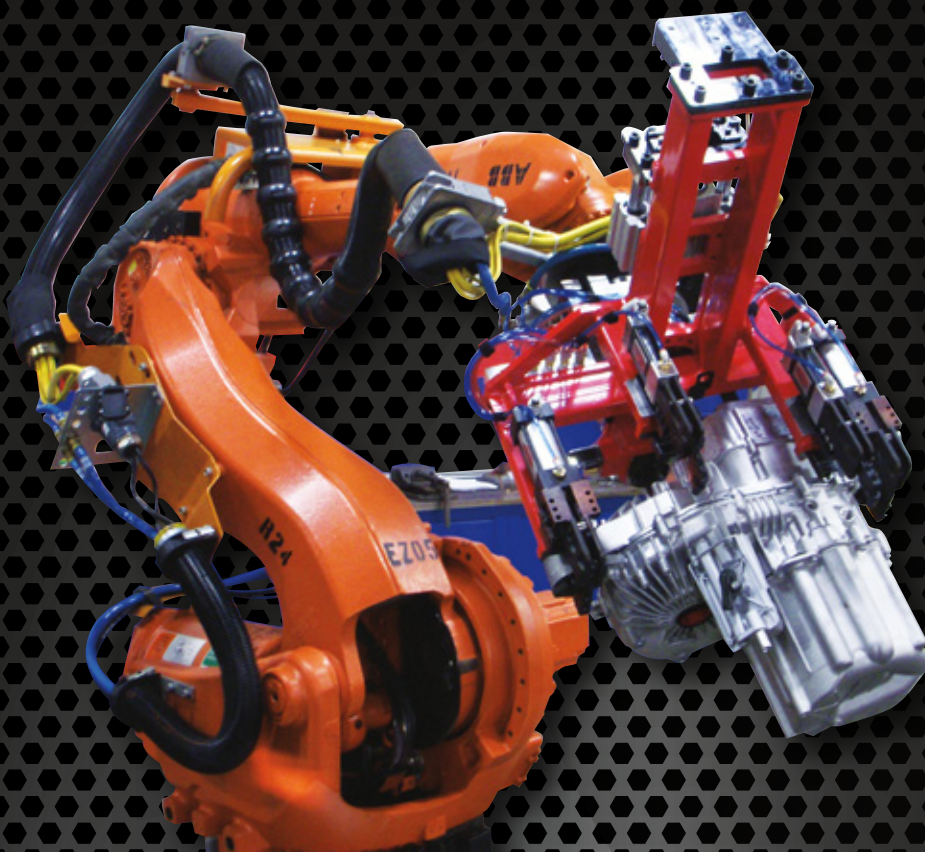

OUR NETWORK

Monroe has assembled a comprehensive network of suppliers for weldments, castings, and processes such as laser and waterjet cutting, heat treatments, and plating. They expand and complete our capabilities. Quality is continuously monitored, competitive bidding keeps prices lean.
